

## 2012 Solstice Greeting

We have reason to be grateful this 2012 Holiday Season!  
The world did not end yesterday on the Solstice,  
as was predicted in the ancient Mayan Calendar  
It looks like we will all be around a bit longer!  
Best wishes to each of you in the forthcoming time!

December 21, 2012 (Solstice) is the end date of the 5,125 year Mayan Calendar (pictured above). Various astronomical alignments have been proposed regarding this date. Some predicted the end of the world as we know it (pronounced “EOWAWKI”) caused by the arrival of the next solar maximum, an interaction between Earth and the black hole at the center of our galaxy, and/or a polar shift in the Earth's axis. A ‘New Age’ interpretation is that it marks the beginning of a new time in which humanity undergoes positive physical and spiritual transformations.
