

## 2013 Solstice Greeting

The turn in the solar year (change of planetary tilt) leads to longer days in the Northern Hemisphere. The time around the Winter Solstice (Saturday 21 December) has been celebrated in myriad cultures, each with different names and legends.

Above we see the Japanese Sun Goddess Amaterasu emerging from a cave symbolizing the 'Return of Light', as the days grow longer.

May the forthcoming year bring health, happiness, and the fulfillment of your aspirations!
